**Organic Membranous Milkvetch Root (*Astragalus membranaceus* (Fisch.) Bunge.)**

With a rich history of use in Chinese and Asian cultures, organic Astragalus is an ancient component of traditional Chinese medicine. Native to Northern China and Inner Mongolia, this herb is a staple of TCM (Traditional Chinese Medicine), where it has been used for centuries as a superior tonic to protect the liver, and to fight bacteria and viruses. But with a long-term digging in a large scale, wild Astragalus roots are becoming less and less, even on the verge of extinction.
